

Customer Journey Map

Date	25 June 2026
Team ID	
Project Name	Rising Waters – A Flood Prediction
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Open the Flood Prediction website • Login/Register • Navigate to Prediction page	• Enter weather and environmental parameters • Verify the entered information • Submit prediction request	• View flood risk prediction • Download or save prediction result • Take preventive actions based on prediction
Touchpoint <i>What part of the service do they interact with?</i>	• Flask Web Application • Login Page • Home Dashboard	• Prediction Input Form • Machine Learning Model • Validation System	• Prediction Results Dashboard • Prediction History • Report/Result Display
Customer Thought <i>What is the customer thinking?</i>	• I need to know today's flood risk. • Is this system reliable? • Can I easily use this application?	• I hope my inputs are correct. • Will the prediction be accurate? • How fast will I get the result?	• Is my area safe from flooding? • What precautions should I take? • Can I trust this prediction?
Customer Feeling <i>What is the customer feeling?</i>	• Curious • Hopeful • Interested	• Focused • Slightly Concerned • Confident	• Relieved (if Low Risk) • Alert (if High Risk) • Prepared to take action

Process Ownership <i>Who is in the lead on this?</i>	• Flask Authentication Module • User Interface • System Administrator	• ML Prediction Engine • Data Validation Module • Trained ML Model	• Flask Result Module • Prediction History Module • User Interface
Opportunities <i>How can we improve this stage?</i>	• Simplify login process • Improve user-friendly interface • Improve accessibility for all users	• Auto-fill weather data using APIs • Reduce prediction processing time • Increase prediction accuracy	• Provide safety recommendations • Display flood risk on interactive maps • Send emergency alerts for high-risk areas
